Dear Mr. Curtain,

As long time home owners and tax payers we have for many years regretted the condition of Naylor's Run as it crosses on the surface through our park and playground. We feel that work to clean up the source and sources of this toxic waste should be done NOW instead of just talking about it as our politicians have done for too long.

Commercial establishments pay taxes but they should be made to abide by laws and regulations, which it is up to our officers to follow (and not just at election time.) A treatment plant should be installed.

If the Chewing Gum Factory is dumping waste, this should be stopped NOW. Years ago they claimed they could not control the odor and it took citizen protest to convince them to do it.

Let's Maintain our fine township!

Sincerely,

AR500169

Henry G. Meyer
